

Textures of Materials: Proceeding of the Fifth International Conference on Textures of Materials March 28 31, 1978, Aachen, Germany Volume I

By -

Springer. Paperback. Book Condition: New. Paperback. 572 pages. Dimensions: 11.0in. x 8.2in. x 1.3in. Many important properties of a polycrystalline material are known to depend on the orientation of the crystallites. The distribution of these orientations is referred to as its texture. During the past decade a remarkable sophistication of experimental methods, of texture determination and texture representation has been achieved, and, at the same time, a fast development of texture applications, for the improvement of materials properties and for investigating the processes underlying the texture formation has taken place. As a consequence of this increasing interest in texture analysis and control in research and practice, world wide conferences on textures of materials were established in order to master the increasing flood of ideas and results. Until now five of such meetings were held, namely in Clausthal (1969), Cracow (1971), Pont-a-Mousson (1973), Cambridge (1975), and in Aachen (1978). The sixth conference of this series will be held in Tokyo. The present two volumes contain the refereed proceedings of the 5th International Conference on Textures of Materials (ICOTOM 5). It was held from March 28-31, 1978 at the Institut für Allgemeine Metallkunde und Metallphysik of the Rheinisch-Westfälische Technische Hochschule Aachen....

Reviews

Good eBook and useful one. It is amongst the most remarkable ebook i actually have study. You can expect to like the way the article writer publish this pdf.

-- Prof. Armand Senger DVM

Absolutely essential go through book. It can be rally fascinating throug studying period of time. You wont truly feel monotony at at any time of your respective time (that's what catalogues are for concerning in the event you question me).

-- Roberto Leannon
