First, theories of social capital are illuminated by comparing the concepts of Putnam, Bourdieu and Granovetter. Second, by the example of the German program Socially Integrative City (SIC), a recent nationwide strategy (aimed at revitalizing deprived neighborhoods) is analyzed. Which of the aforementioned concepts of social capital (or concept-elements) are implemented in the SIC-initiative For answering this question key documents that outline the aforementioned policies are reviewed. Policies and objectives of the SIC-initiative which can be related to the three depicted approaches to social capital are identified. In the framework of this analysis there is particular consideration of the sub-concepts of social capital: bonding, bridging and linking. With this the author reveals which kinds of social relationships between people and different population-groups are planned to be established. In this context the function of social capital is particularly considered. Finally, after the discussion of recent critiques on social capital theories, these are evaluated with regard to their usefulness for social policies in deprived urban areas. 20 pp. Englisch.
