Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from First Lessons in Physics The conviction that an elementary knowledge of some important instruments, machines and physical phenomena can and should be given in our Common Schools, has induced the author to prepare the present little volume. Its object is the presentation of a number of phenomena, laws, and applications of the same, specially adapted to the perceptive capacities of the pupils of the upper grades. Inasmuch as the demand of a large amount of time might delay the introduction of physical science into the Common School, the book has been so prepared as to secure good results in the minimum of time ever given any study in our schools, viz.: one lesson a week. Each of the thirty-nine lessons commences with a fact familiar to the child, or an easy little experiment, which serves as the basis for the development of a natural law. After this law, comes the application man makes of it - such as the barometer, thermometer, pump and hydrostatic press. Costly apparatus is unnecessary.
